

MegaNatural

Gold Grape Seed Extract

MegaNatural Gold Grape Seed Extract contains over 90% natural proanthocyanins - key active ingredients found in red grape juice that have been shown to provide a variety of health benefits.

MegaNatural Gold Grape Seed Extract contains pure grape seeds - no skins or stems and is made by a patented water extraction process (U S Patent No. 6,544,581). This patented process provides a consistent high grade extract with a low molecular weight for potentially greater absorption.

MegaNatural Gold Grape Seed Extract has been shown in studies to be superior to other grape seed extracts in its ability to support normal levels of oxidized LDL. It remains active in the bloodstream for over four hours.

MegaNatural Gold Grape Seed Extract is self affirmed Generally Recognized As Safe (GRAS) for use in dietary supplements, most foods, and beverages.

MegaNatural® is a trademark of Polyphenolics, a division of Constellation Wines, U.S.

These statements have not been evaluated by the FDA. The product is not intended to diagnose, treat, cure, or prevent any disease.

Protect! Your Heart!

Q: Why Supplement with Grape Seed extract?

MegaNatural® Gold Grape Seed Extract is one of the most potent antioxidants available today. It is a rich source of the pure grape compounds that promote a variety of health benefits, such as its cell-protecting properties and cardiovascular protection. Even better, when MegaNatural Gold Grape Seed Extract is taken in combination with either Vitamin C or Vitamin E, in the proper ratio, the vitamin's antioxidant capacity is doubled.

MegaNatural Gold Grape Seed Extract helps support normal arterial function.

MegaNatural Gold Grape Seed Extract supports normal endothelium cell function.

MegaNatural Gold Grape Seed Extract is all natural - No Solvents Added and it is Pesticide Free.

"The exciting news is that MegaNatural Gold Grape Seed Extract makes an ideal dietary supplement for those who want the powerful protective properties of the same antioxidants found in red grape juice." Professor Roger Corder, William Harvey Research Institute, Queen Mary, University of London.
